

Dear Parents and Carers,

RE Year 10 and 12 Assessments

Further to our letter dated 14th May, I am writing to let you know the details of the Year 10 and 12 Assessments which we have planned for the three-week period beginning on 8th June (lasting until Friday 26th June).

Students will sit a range of assessments which represent largely their GCSEs and A Levels (rather than their BTEC qualifications). This is because of the nature of the assessments for GCSEs which are largely assessed at the end of Year 11 or 13 (depending on the year group of the student), rather than BTECs which are assessed continually. BTEC teachers will have been assessing students' work as an ongoing part of the process for the whole academic year and will continue to do so into next academic year as well.

These assessments will be part of their home study and will not be completed during school time following the school opening to Year 10 and 12 on 15th June as per government guidance. Instead we will use this school time to support students in revision for these assessments, and to help move their learning forward.

Please see below for the list of assessments for Year 10 and 12 alongside their respective deadlines for submission.

Teachers will provide full instructions for each paper, and how to submit them when completed. The papers and instructions will be available through the same methods that students have been accessing work. As an example, if students have internet access at home, they will access the assessment through Maths Watch, whereas if students do not have internet access at home, we will post home these Maths papers. We would like to take this opportunity to wish your child all the best in these assessments. They are an opportunity to shine and show us how much you have learnt during Lockdown!

Yours faithfully

Mr Bradnick-Thompson
